

# Vaersenbaai

(Kokomo Beach)

**A typical Curacao dive site, in a lovely beach setting, hosting - amongst other things - one of the most beautiful underwater concrete blocks!**

A swim out over the shallow sand patch takes you past the mooring block for the old pontoon (well worth checking out on your way back) then to the edge of the long, long reef. You never know what you'll find at this dive site - frog fish, sea horses, turtles, dolphins in the distance. Always a good and varied dive site - hardly ever the same twice!  
You'll pass the flamingo salt flats en route so keep your camera handy.
